Find your balance between food and physical activity

- Be sure to stay within your daily calorie needs.
- Be physically active for at least 30 minutes most days of the week.
- About 60 minutes a day of physical activity may be needed to prevent weight gain.
- For sustaining weight loss, at least 60 to 90 minutes a day of physical activity may be required.
- Children and teenagers should be physically active for 60 minutes every day, or most days.

Know the limits on fats, sugars, and salt (sodium)

- Make most of your fat sources from fish, nuts, and vegetable oils.
- Limit solid fats like butter, stick margarine, shortening, and lard, as well as foods that contain these.
- Check the Nutrition Facts label to keep saturated fats, trans fats, and sodium low.
- Choose food and beverages low in added sugars. Added sugars contribute calories with few, if any, nutrients.

MENU PLANNING IN THE NATIONAL SCHOOL LUNCH PROGRAM

The National School Lunch Act mandates that school meals "safeguard the health and well-being of the Nation's children". Participating schools must serve lunches that are consistent with the applicable recommendations of the most recent Dietary Guidelines for Americans including: eat a variety of foods; choose a diet with plenty of grain products, vegetables and fruits; choose a diet moderate in sugars and salt; and choose a diet with 30% or less of calories from fat and less than 10% of calories from saturated fat. In addition, lunches must provide, on average over each school week, at least 1/3 of the daily Recommended Dietary Allowances for protein, iron, calcium, and vitamins A and C. To provide local food service professionals with flexibility, there are four menu planning approaches to plan healthful and appealing meals. Schools choose one of the approaches below. The choice of what specific foods are served and how they are prepared and presented are made by local schools.

The Traditional Food-Based Menu Planning Approach

Under the Traditional Food-Based Menu Planning Approach, schools must comply with specific component and quantity requirements by offering five food items from four food components. These components are: meat/meat alternate, vegetables and/or fruits, grains/breads, and milk. Minimum portion sizes are established by ages and grade groups.

(See chart on following page)

² For the purposes of this table, a week equals five days.

The Traditional Food-Based Menu Planning Approach is designed to meet nutritional standards set forth in program regulations.

The Enhanced Food-Based Menu Planning Approach

The Enhanced Food-Based Menu Planning Approach is a variation of the Traditional Menu Planning Approach. It is designed to increase calories from low-fat food sources in order to meet the Dietary Guidelines. The five food components are retained, but the component quantities for the weekly servings of vegetables and fruits and grains/breads are increased.

FOOD BASED MENU SYSTEM

LUNCH

MINIMUM QUANTITIES

At a minimum, schools shall serve meals in the quantities provided in the following chart

Meal Component	Ages 1-2	Preschool	Grades K-6	Grades 7-12
Milk	6 ounces	6 ounces	8 ounces	8 ounces
Meat/Meat Alternate	1 ounce	1 ½ ounces	2 ounces	2 ounces

CALORIE AND NUTRIENT LEVELS

At a minimum, schools shall provide the following calorie and nutrient levels over a school week

	Preschool	Grades K-6	Grades 7-12

Vitamin C (mg)	14	15	18

¹ Not to Exceed 30% over a school week

² Not to Exceed 10% over a school week

The Nutrient Standard Menu Planning Approach

Nutrient Standard Menu Planning (sometimes called “NuMenus”) is a computer based menu planning system that uses approved computer software to analyze the specific nutrient content of menu items automatically while menus are being planned. It is designed to assist menu planners in choosing food items that create nutritious meals and meet the nutrient standards.

The Assisted Nutrient Standard Menu Planning Approach

Assisted Nutrient Standard Menu Planning (sometimes called “Assisted NuMenus”) is a variation of Nutrient Standard Menu Planning. It is for schools that lack the technical resources to conduct nutrient analysis themselves. Instead, schools have an outside source, such as another school district, State agency or a consultant, plan and analyze a menu based on local needs and preferences. The outside source also provides schools with recipes and product specifications to support the menus. The menus and analyses are periodically updated to reflect any changes in the menu or student selection patterns.

Here are the required minimums for nutrients and calories for these nutrient standard menu planning approaches:

MINIMUM NUTRIENT AND CALORIE LEVELS FOR SCHOOL LUNCHES NUTRIENT STANDARD MENU PLANNING APPROACHES (SCHOOL WEEK AVERAGES)				
	MINIMUM REQUIREMENTS			OPTIONAL
NUTRIENTS AND ENERGY ALLOWANCES	Preschool 1	Grades K- 6	Grades 7-12	Grades K-3
Energy allowances (calories)	517	664	825	633
Total fat (as a percentage of actual total food energy)	¹	^{1, 2}	²	^{1, 2}
Saturated fat (as a percentage of actual total food energy)	¹	^{1, 3}	³	^{1, 3}
RDA for protein (g)	7	10	16	9
RDA for calcium (mg)	267	286	400	267
RDA for iron (mg)	3.3	3.5	4.5	3.3
RDA for Vitamin A (RE)	150	224	300	200
RDA for Vitamin C (mg)	14	15	18	15

¹ The Dietary Guidelines recommend that after 2 years of age “...children should gradually adopt a diet that, by about 5 years of age, contains no more than 30 percent of calories from fat.”

² Not to exceed 30 percent over a school week

³ Less than 10 percent over a school week

Alternate Menu Planning Approach

This menu planning approach allows states and school districts to develop their own innovative approaches to menu planning, subject to the guidelines established in our regulations. These guidelines protect the nutritional and fiscal integrity of the program.

OVS: Who, When, and Where?

OVS is:

- Required for lunch at senior high schools
- Optional at lunch in lower grade levels
- Optional at breakfast in all grades

Who decides?

- School food authority decides:
 - whether to implement OVS when optional and in what grades
 - whether students below high school can decline 1 or 2 food items at lunch
- Students decide what foods to decline

What's for Lunch?

Students must be offered a lunch that contains:

- 5 food items...
- from the 4 food components...
- in at least the minimum serving sizes for the appropriate age/grade group.

The 4 food components at lunch are:

<i>Component</i>	<i>Abbreviation</i>
Meat/Meat Alternate	M/MA
Vegetables/Fruits	V/F
Grains/Breads	G/B
Milk	Milk

The 5 food items at lunch include:

- Meat/Meat Alternate
- Grains/Breads
- Vegetables/Fruits—two or more servings of different kinds of vegetables and/or fruits
- Milk

Reimbursable Lunches

General requirements for OVS at lunch are:

- Schools must offer at least the minimum serving sizes of all 5 food items.
- Students must select the minimum number of items required (at least 3 of 5 for senior high school; 3 or 4 of 5 for lower grades).
- Must take full servings to count toward a reimbursable meal.
- May decline any food item, including the entrée or milk.
- May take smaller portions of declined food items (does not affect price).
- Lunch must be priced as a unit.

Production Planning Tips

To achieve the OVS goal of less food waste:

- Keep accurate menu production records.
- Use forecasting to plan food quantities.
- Use cycle menus.

School Nutrition Staff Roles

Menu planners:

- Plan tasty, attractive menus featuring students' cultural and ethnic favorites.
- Include consistent numbers of food items and food item choices daily.
- Review menus to ensure meals meet daily and weekly requirements.
- Communicate menus to other staff.
- Educate students, teachers about OVS.

Cooks:

- Prepare the planned menu as directed.
- Follow standardized recipes.
- Portion foods accurately.

School Nutrition Staff Roles (continued)

Servers:

- Display food choices clearly, attractively.
- Ensure correct portion sizes.
- Encourage students to select a complete meal, via:
 - Enthusiastic comments
 - Merchandising

Cashiers:

- Review the planned menu:
 - Food items
 - Serving sizes
 - Reimbursable meals
- Remind students of choices and unit price.
- Practice!

Meal Service Efficiency

Issue: “OVS meal service takes too much time.”

Solutions to try:

- Educate students, adults.
- Rearrange service area to improve flow.
- Add a cashier during rush times.
- Post choices at start of service line.
- Use posters, table tents, etc. to explain concept of OVS.

Issue: “Offer more choices?! Our serving space is already cramped!”

Solutions to try:

- Use smaller size serving pans.
- Use tiered shelving.
- Offer combination foods.
- Purchase mobile serving counters/carts.

Promoting to Parents

Concerns:

- Students should take and eat all foods.
- Students can't make wise food choices.
- Students lose benefits if they decline foods.
- Kids won't get enough to eat.
- Same price for less food.

Strategies:

- Presentation of goals, benefits.
- Invite them to observe meal service.
- Newsletter updates.
- Open communication.

Key messages:

- Students can make food selections, and will more likely eat what they select.
- Parents and other adults teach kids—by example—to make healthful choices.
- We encourage students to select all foods offered.
- Policy for extra portions at extra cost is unaffected by OVS.
